

Agriculture Energy Alliance

Representing agriculture as a producer and consumer of energy

September 13, 2006

United States House of Representatives
Washington, D.C. 20515

RE: Support Offshore Oil and Gas Production Now

Dear Representative:

The 107 members of the Agriculture Energy Alliance (AEA) strongly urge you to support offshore production legislation that will allow for oil and gas drilling in the Outer Continental Shelf. This legislation needs to be sent to President Bush for his signature prior to adjournment. It is absolutely critical to agriculture that Congress pass this key legislation to address high natural gas prices and the negative effect these prices have on agriculture. We cannot allow this opportunity to wait for another day, so please ensure that every effort is made to help agriculture by supporting passage of an offshore production bill now.

Agriculture needs additional supplies of natural gas to help ease the pain of increased prices of inputs, fertilizer and other business costs. The AEA urges the House to complete its work and to send a bill to the President now to pass legislation that will significantly improve natural gas supply in the United States. Throughout the debate on energy policy, the AEA has consistently urged Congress to pass legislation that would allow expanded production in the Outer Continental Shelf.

The AEA represents a broad-based coalition of farm organizations and agribusinesses that face a crisis because of government policies that have created demand for natural gas while at the same time restricting access to supply sources. The farm sector depends on significant amounts of natural gas for food processing, irrigation, crop drying, heating farm buildings and homes and the production of crop protection chemicals and nitrogen fertilizer.

Additional supply of American energy resources is important to maintaining a competitive agricultural sector. AEA supports legislation that will provide an enhanced role for development of offshore energy resources leading to a more diverse energy portfolio and additional supplies of natural gas. We urge you to support offshore production legislation that is critical to U.S. farmers, agribusinesses and other energy consumers. We ask that you
