

# Comparison of 181 Boundaries

1. The **red line** is the line used in the Martinez-Nelson bill. The bill would permanently place into moratoria the territory east of the line.
2. Within the large **blue box** (the 181 "bulge"), the Domenici-Bingaman bill would make the area west of the **black line**, more than 100 miles offshore, available for leasing within one year of the date of enactment.
3. The Administration's Draft Proposed 5-Year leasing program would make the area west of the **yellow line** (until it meets the 100 mile contour) available for leasing, assuming that the Congress does not continue the appropriations moratoria in that area, and the President must amend the Presidential withdrawal to allow leasing.
