

Agriculture Energy Alliance

Representing agriculture as a producer and consumer of energy

June 27, 2006

To: Members U.S. House of Representatives

Re: Please Vote in Favor of HR 4761 – Deep Ocean Energy Resources Act of 2006

Dear Member of Congress:

The Agriculture Energy Alliance (AEA) urges you to support HR 4761, a bill to provide for exploration, development and production of oil and natural gas in the Outer Continental Shelf.

Additional supply of natural gas is critical for agricultural uses: food processing, irrigation, crop drying, heating farm buildings and homes, and production of crop protection chemicals and nitrogen fertilizers.

Your support for HR 4761 will demonstrate to AEA members your concern for the adverse impact that high and volatile natural gas prices are having on agricultural consumers.

The 105 members of the AEA represent a broad-based coalition of farm organizations and agribusinesses that face a crisis because of government policies that have created demand for natural gas while at the same time restricting access to supply sources.

Please, we urge you to vote in favor of HR 4761 when the bill comes before the House of Representatives.

Sincerely,
